PAWAN KUMAR NIMMAKAYALA

Software Development Engineer | Full-Stack Developer
Visakhapatnam, India | +91 96529 81118 | nimmakayalapawankumar7@gmail.com | linkedin.com/in/pawan-kumar-nimmakayala
github.com/PAWAN1118 | Portfolio: pawan1118.github.io/Portfolio

Summary

Software Development Engineer with hands-on experience building production full-stack applications using Java, Spring Boot, React.js, PostgreSQL, and Redis. Delivered backend services and RESTful APIs for four live products serving 5,000+ active users, improving API response times by 45%. Strong foundation in data structures, algorithms, and system design, with added experience in Generative AI (RAG, multi-agent systems). Final-year B.Tech in Computer Science (CGPA 9.3/10), seeking SDE and Full-Stack Developer roles.

Technical Skills

Languages: Java, Python, JavaScript, SQL, C
Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), System Design, Database Design, Microservices, API Design
Backend & Frontend: Spring Boot, FastAPI, Flask, Node.js, Express.js, Prisma, React.js, Next.js, REST APIs
Data & Infrastructure: PostgreSQL, Redis, MongoDB, Celery, AWS (EC2, S3), Docker, GitHub Actions (CI/CD), Linux
AI/ML: LangChain, OpenAI API, RAG, Vector Databases, Prompt Engineering, PyTorch, TensorFlow, Scikit-learn, NLP
Tools: Git, Postman, JIRA, pytest, JUnit, Agile, IntelliJ IDEA, VS Code

Experience

Kyrowork Technologies (Alcove) **May 2026 – Present**
Software Developer Intern *Visakhapatnam, India*

- Engineered scalable backend services using Java, Spring Boot, PostgreSQL, and Redis for four production applications (HealthBuddy, JyothishHub, Extractum, KyroPOS) serving 5,000+ active users.
- Designed secure RESTful APIs for authentication, booking, and payments with OAuth 2.0 and JWT; reduced API response times by 45% through query optimization and Redis caching.
- Built reusable Java service modules shared across three projects, cutting code duplication by 35% and improving maintainability.
- Developed responsive React.js dashboards with real-time data visualization, collaborating in Agile sprints using Git, Docker, and Postman.

Medikloud **Dec. 2025 – Mar. 2026**
Full Stack Developer *Remote*

- Developed full-stack features for a digital healthcare platform, covering patient-facing interfaces and backend REST APIs.
- Implemented appointment booking, medical records, and notification services, plus role-based access control (RBAC) with Prisma for patients, doctors, and administrators.
- Partnered with the engineering team to improve platform performance and reliability for remote patients.

Projects

HealthBuddy | *Spring Boot, PostgreSQL, Redis, RAG* **healthbuddy.aditha.in**

- Built core modules for appointment booking, authentication, and patient records, supporting 5,000+ active users.
- Integrated a RAG-powered conversational AI agent on WhatsApp, enabling patients to book appointments, get health guidance, and access records through natural-language chat.
- Implemented ABHA (Ayushman Bharat Health Account) integration, aligning the platform with India's national digital health ecosystem for portable patient records.

KyroPOS | *Spring Boot, PostgreSQL, Redis, React.js* **kyropos.com**

- Built a full-stack point-of-sale platform for order management, billing, and kitchen workflow coordination.
- Automated end-to-end order processing, reducing manual errors and turnaround time for restaurant staff.

CollabSphere | *Next.js, Node.js, WebSockets, PostgreSQL* **collab-sphere-khaki.vercel.app**

- Built a real-time collaboration platform with chat, shared documents, and AI-assisted content creation for remote teams.

AI Multi-Agent Code Generation System | *Python, LangChain, FastAPI, Redis* **Jan. 2026 – Mar. 2026**

- Engineered an autonomous multi-agent system with planner, coder, and reviewer agents (LangChain, GPT-4), processing 100+ code generation requests per hour at 85% accuracy.
- Reduced generation latency by 60% and tripled throughput using FastAPI microservices, a Redis-backed Celery task queue, and a RAG-based context pipeline.

Extractum | *Python, Flask, PyMuPDF, OCR, Supabase* **github.com/PAWAN1118/Extractum**

- Built a PDF extraction application for text, tables, images, and metadata, with OCR support for scanned files and optional Supabase storage.

Education

Anil Neerukonda Institute of Technology and Sciences (Andhra University) **Sep. 2023 – Apr. 2027 (Expected)**
B.Tech in Computer Science, Minor in AI & Machine Learning *CGPA: 9.3/10*

Certifications & Achievements

- **Amazon ML Hackathon:** Advanced to the final round; **Eureka Challenge 3.0** (National-Level Hackathon): Semi-finalist
- **IBM Full Stack Software Developer Professional Certificate** (Coursera); **Programming in Java** (NPTEL / IIT)
